

BIOCLEAR BLOCKS - S/M/L

WHAT IS IT?

- BioClear Blocks are solid, bacteria-laden blocks for use in degrading organic waste.
- The block will gradually dissolve over a 1-4 month period, providing continuous treatment for efficient degradation of waste.
- The high number of safe, naturally-occurring bacteria contained in the block will drastically reduce odor, sludge, fats, oils, and grease buildup in your collection system.

WHY WOULD I USE IT?

If you want:

- Continuous 24-hour treatment of wastewater collection systems
- Reduction in hydrogen sulfide and other odor-causing molecules
- Rapid breakdown of fats, oils, greases, and sludge
- Reduction in labour costs needed to maintain dosage and dosing equipment
- A more efficient collection system requiring fewer pump-outs

HOW DO I USE THEM?

Simply suspend the BioClear Block into the treatment area, hanging halfway into the grease trap. The brick will dissolve slowly over a 1-4 month period, depending on size and flow rates.

BioClear Blocks Small	<600L grease trap	35-75 days
BioClear Blocks Medium	600L-2000L grease trap	60-90 days
BioClear Blocks Large	>2000L grease trap	100-120 days

SPECIFICATIONS

pH	6.0 - 8.0
Physical Aspect	Solid block, tan coloured
Packaging	BioClear Blocks S – 2.99kg (6.6lb) BioClear Blocks M – 4.54kg (10lb) BioClear Blocks L – 13.6kg (30lb)

STORAGE

Shelf Life

Use within 1 year after opening.

Store in a cool dry place
with good ventilation

Wash hands thoroughly
after using

Avoid direct sunlight
